

BECOME A GLASS GUARDIAN!

GLASS GUARDIANS IS FOR 7-11 YEAR OLDS

School children have been given the opportunity to become a Glass Guardian - we've worked with [British Glass](#) and teamed up with the [National Schools Partnership](#) to design a new recycling educational programme.

Glass Guardians is for 7-11 year olds and it teaches children about the importance of glass recycling and how it is 100% recyclable which can be re-melted indefinitely and made back into bottles and jars with no loss of quality.

School children are our future and we want them to understand every single glass jar and bottle that's put into recycling counts. At present, around one third of the bottles and jars we use never get the chance to be made into new glass – often because people don't recycle.

We want to make sure that every bottle and jar is put back into the system and we hope young people can become Glass Guardians and support that aim by encouraging them to champion the importance of recycling to protect their planet.

Part of the programme includes a competition where children can get creative and come up with ideas for how to get people to recycle more glass. The best ideas will win prizes and children can win an Amazon Fire tablet and £500 worth of equipment vouchers for their schools.

The programme includes tasks for English, Maths, Science, PSHE and Citizenship as well as a take home activity where parents can also get involved by helping children to find out about recycling in their area.

By taking part, schools can also use Glass Guardians towards the Eco School Awards.

If you are a school or teacher and would like to access the resources, you can register and download them from the [National Schools Partnership](#).

If you are a parent, ask your child's school about Glass Guardians and how you can get involved.
